

While gathering data for the *Diaries* project I came across some interesting and unusual items. For example: when an unusual expression or item was first encountered, why some items cataloged as “Diaries” are not included in the published book, when a diarist met a *noteable*, when a diary included drawings or photographs, the name of the ship when on a voyage, etc. These items were recorded in the spreadsheet for each society. The final format allowed space for *some* of that *extra data*, but not for all of it. So that information is presented here.

The abbreviations used are:

B: births
B&M: Boston and Maine Railroad
both: a diary penned by a husband and wife
CSA: Confederate States of America
D: deaths
fc: female child
ft: female teen
fa: female adult
female: female teen or female adult
FR: family record (family BMDs)
good data: better information than the average diary
M: marriages
mc: male child
mt: male teen
ma: male adult
male: male teen or male adult
NEHGS: New England Historic Genealogical Society

A *Collection Name* or *Date* with a strikethrough indicates that item was not a diary and does not appear in the final published book.

Any unusual words or call numbers are explained in the *Diaries* introduction (part of the *Diaries Sample* located where this PDF file resides).

Some of the items below do not have dates and/or locations. This data was not recorded initially because the item was not a diary, and subsequently that information was not located on the societies’ websites.

I did not examine every diary listed in the published books, so any of those unexamined diaries could contain data as illustrated in the *extra data* spreadsheet below.

| Collection Name | Call number | Box: folder | Date | Location | Gender Age | Extra Data |
